## The 9<sup>th</sup> International Conference on Manipulation, Automation and Robotics at Small Scales

27-31 July 2026, Hangzhou, China

**MARSS**, the annual Int. Conference on Manipulation, Automation, and Robotics at Small Scales, is held on 27-31 July 2026 in Hangzhou, China. MARSS is the flagship forum for cross-disciplinary R&D communities to discuss **manipulation, automation, measurement and characterization at micro/nano scales**, and **all kinds of small scale robots (nm - cm) and their applications**.

**Program:** MARSS2026 offers 10-11 plenary talks and 30-35 technical sessions. The high-profile plenary talks (40 min) will be given by distinguished experts. All accepted papers (full and short) will be presented in the technical sessions (20 min, oral presentation). Accepted full papers will be submitted for inclusion into IEEE Xplore® subject to meeting IEEE Xplore®'s scope and quality requirements.

**Awards:** All presented full papers will contest for various **Best Paper Awards**. The Awards include a certificate and a cash prize. Additionally, MARSS2026 will present **Big-on-Small Award**, along with a commemorative plaque and a cash prize. This Award is intended to promote upcoming talents in MARSS-related fields of research with excellent performance and international visibility.

**Venue:** MARSS2026 will take place on the Yuquan Campus of Zhejiang University. Hangzhou is renowned for its poetic scenery, historic heritage, and vibrant modern culture. At the heart of the city lies the iconic West Lake, where temples, pagodas, and willow-lined shores create a timeless landscape. Strolling along ancient pathways or exploring nearby tea terraces reveals the city's serene charm. As one of China's top universities, Zhejiang University offers a dynamic academic environment within a city that harmoniously blends tradition and innovation.
